**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not  
5 so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a  
single invention to which the claims must be restricted.

Group I, claim(s) 1–3 and 6, drawn to Pep356-related peptides.

10 Group II, claim(s) 4, drawn to an antibody that binds Pep356-related peptides.

Group III, claim(s) 7–9, drawn to a method for modulating microfibril structure comprising  
administering Pep356-related peptide.

15 Group IV, claim(s) 10, drawn to a method of identifying a candidate Pep356-related peptides  
modulator.

The inventions listed as Groups I-IV do not relate to a single general inventive concept  
under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special  
20 technical features for the following reasons: The special technical feature of groups I–IV is  
Pep356-related peptides. In order for the inventions of groups I–IV to have unity of invention it  
is necessary that the special technical feature be a contribution over the prior art. However, the  
international search report filed with the present application indicates that Pep356-related  
peptides cannot be considered novel or cannot be considered to involve an inventive concept.  
25 Therefore, the inventions of groups I–IV do not fulfill the requirements for unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an  
election of a species or invention to be examined even though the requirement be traversed (37  
CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

30 The election of an invention or species may be made with or without traverse. To reserve  
a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 1647

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
